

## Second Call for Experiment Proposals

and

## Call for R&D Proposals for Public end-user Driven Technology Innovation (PDTI) in the Healthcare Scenario

Opening: May 4th 2015

**Deadline: June 23rd 2015, at 17:00 (Brussels time)**

The competitive call for experiment proposals is related to the EU-funded project ECHORD++ (FP7-ICT-601116). In the context of ECHORD++, small-scale projects, “experiments”, will be conducted, which will use state-of-the-art robotic equipment, addressing one of the following scenarios: Cognitive tools and workers for cognitive factories, general purpose robotic co-workers, cognitive logistics robots for industry, medical robotics, agricultural and food robotics, and urban robotics. Each experiment has a maximum duration of 18 months, the funding of an experiment is expected to be about € 300.000. The total indicative funding for this call is € 4.8 Mio.

The competitive call for PDTI R&D proposals addresses healthcare, more specifically Comprehensive Geriatric Assessment. The indicative funding for these PDTI activities amounts to 1.2 Mio. €.

The research community, enterprises and robot manufacturers are asked to submit experiment proposals, written in English only. Please note that FP7 only offers part-funding of research activities.

More information and the full call documents, including the guides for applicants and an electronic submission system, can be found on the web site [www.echord.eu](http://www.echord.eu).
