

The European Coordination Hub for Open Robotics Development

---

## E++ 3rd Review Meeting

WP4 - Peccioli RIF

---

Paolo Dario

The BioRobotics Institute

Scuola Superiore Sant'Anna, Pisa, Italy

---

Luxembourg, February 13, 2017

## Summary

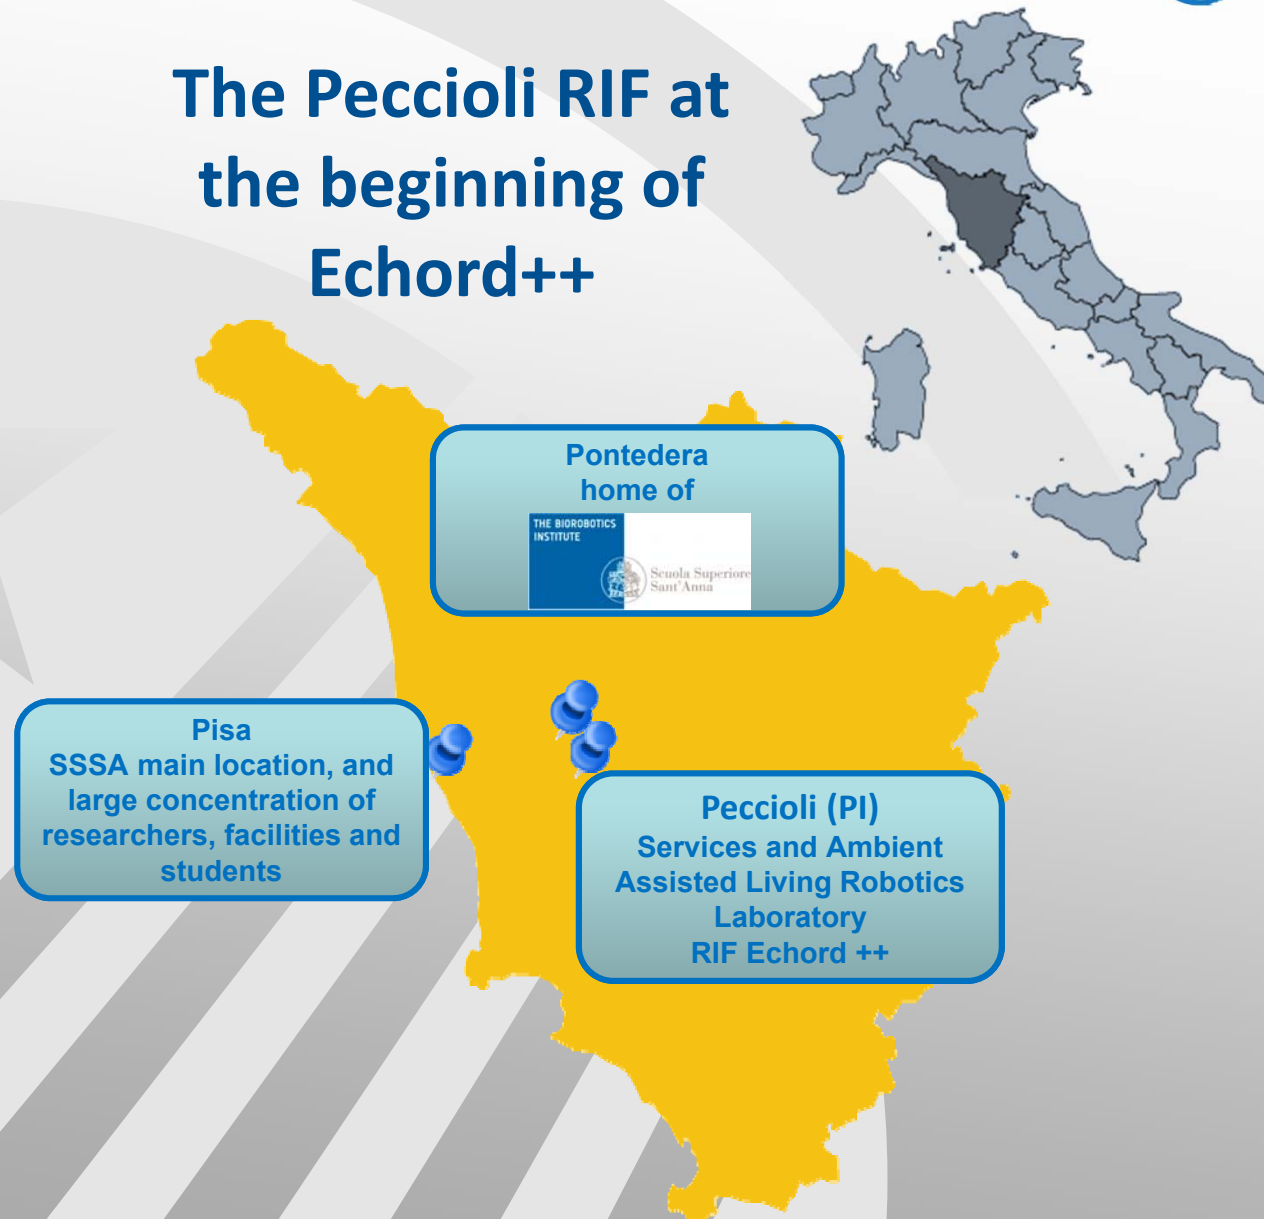

---

- Peccioli RIF model
- The evolution of Peccioli RIF
- Peccioli RIF in a nutshell
- Application process at Peccioli RIF
- Distribution of collaborations
- 7 self sustained projects
- Peccioli RIF & Large Enterprises
- Recent activities
- Statistics
- Plans and actions towards self-sustainability beyond ECHORD++
- Lesson learnt

# Peccioli RIF model

- 5000 people ONLY in Peccioli, 120.000 in Valdera (Peccioli + Pontedera)
- The strategy: **STRENGTHENING** the Peccioli RIF by engaging **MORE** research and testing infrastructures in the nearby area
- More than 1 million people in the Coast area
- Distributed and modular RIF rather than concentrated

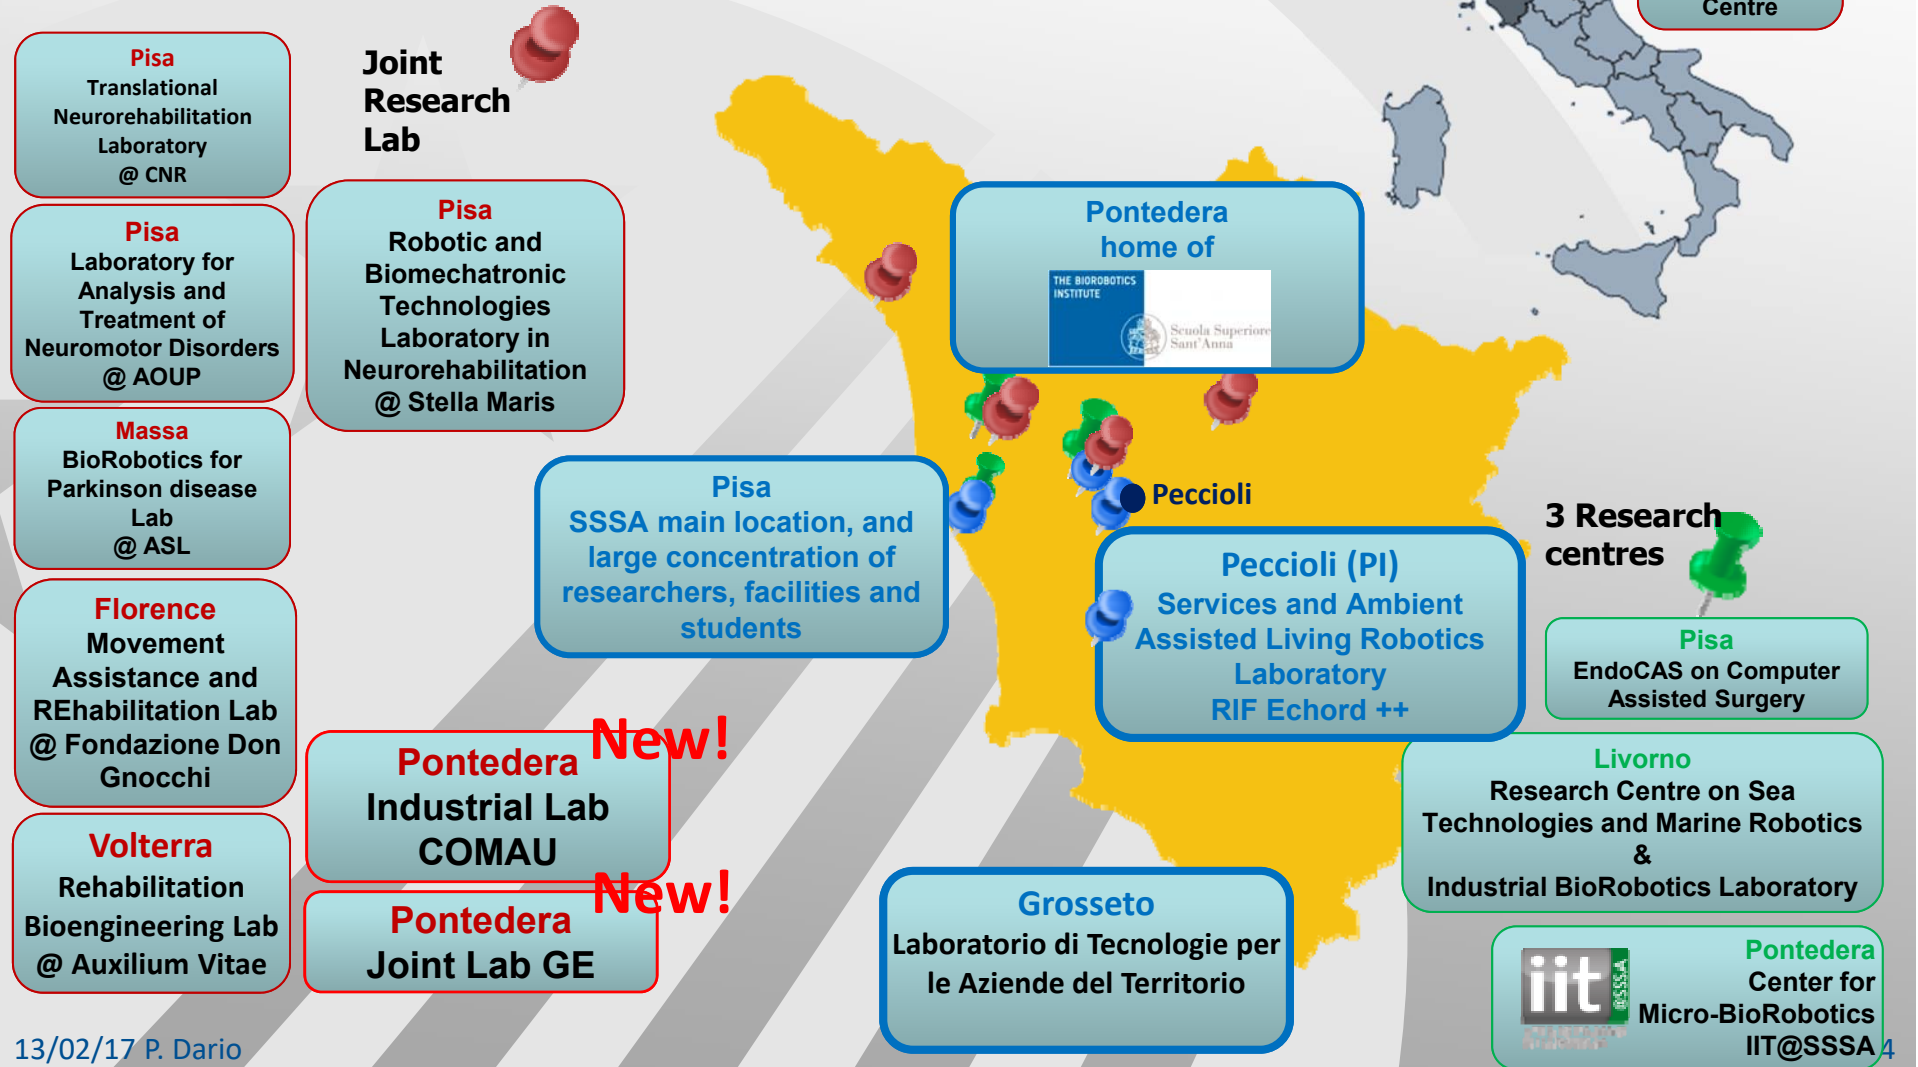

## The Peccioli RIF at the beginning of Echord++

# Evolution of the Peccioli RIF

- MORE academic joint labs
- MORE research centers
- MORE medical research centers
- MORE industrial Joint Labs

# Peccioli RIF in a nutshell

5

Hosted E++  
experiments  
(+ 5 within 2018)

38

Preliminary  
meetings  
with  
SMEs/LEs

7

External  
self-sustained  
projects

10

High tech  
equipment  
(only in Peccioli)

1+1

New!

Competitions  
hosted  
(**ERL Service  
Robotics  
Tournament 2017**)

# Peccioli RIF in a nutshell

Consultancy  
Fields

- Acceptability
- Usability
- Dependability
- Safety
- Benchmarks
- Legal Aspects
- Economic Aspects
- Insurance Aspects
- Ethical Aspects

Research  
areas

- Artificial hands
- Creative engineering design
- Neuro Robotics
- Robot companions for citizens
- Sensor signals and information processing
- Soft Robotics
- Surgical Robotics and allied technologies
- Traslational neural engineering

**Circular Economy**

Joint labs

- Laboratory for Analysis and Treatment of Neuromotor Disorders
- BioRobotics for Parkinson disease Lab
- Movement Assistance and REhabilitation Lab
- Rehabilitation Bioengineering Lab
- Translational Neurorehabilitation Laboratory
- Robotic and Biomechatronic Technologies Laboratory in Neurorehabilitation

**Joint Lab COMAU**

**Joint Lab GE**

Active very  
close to the  
RIF

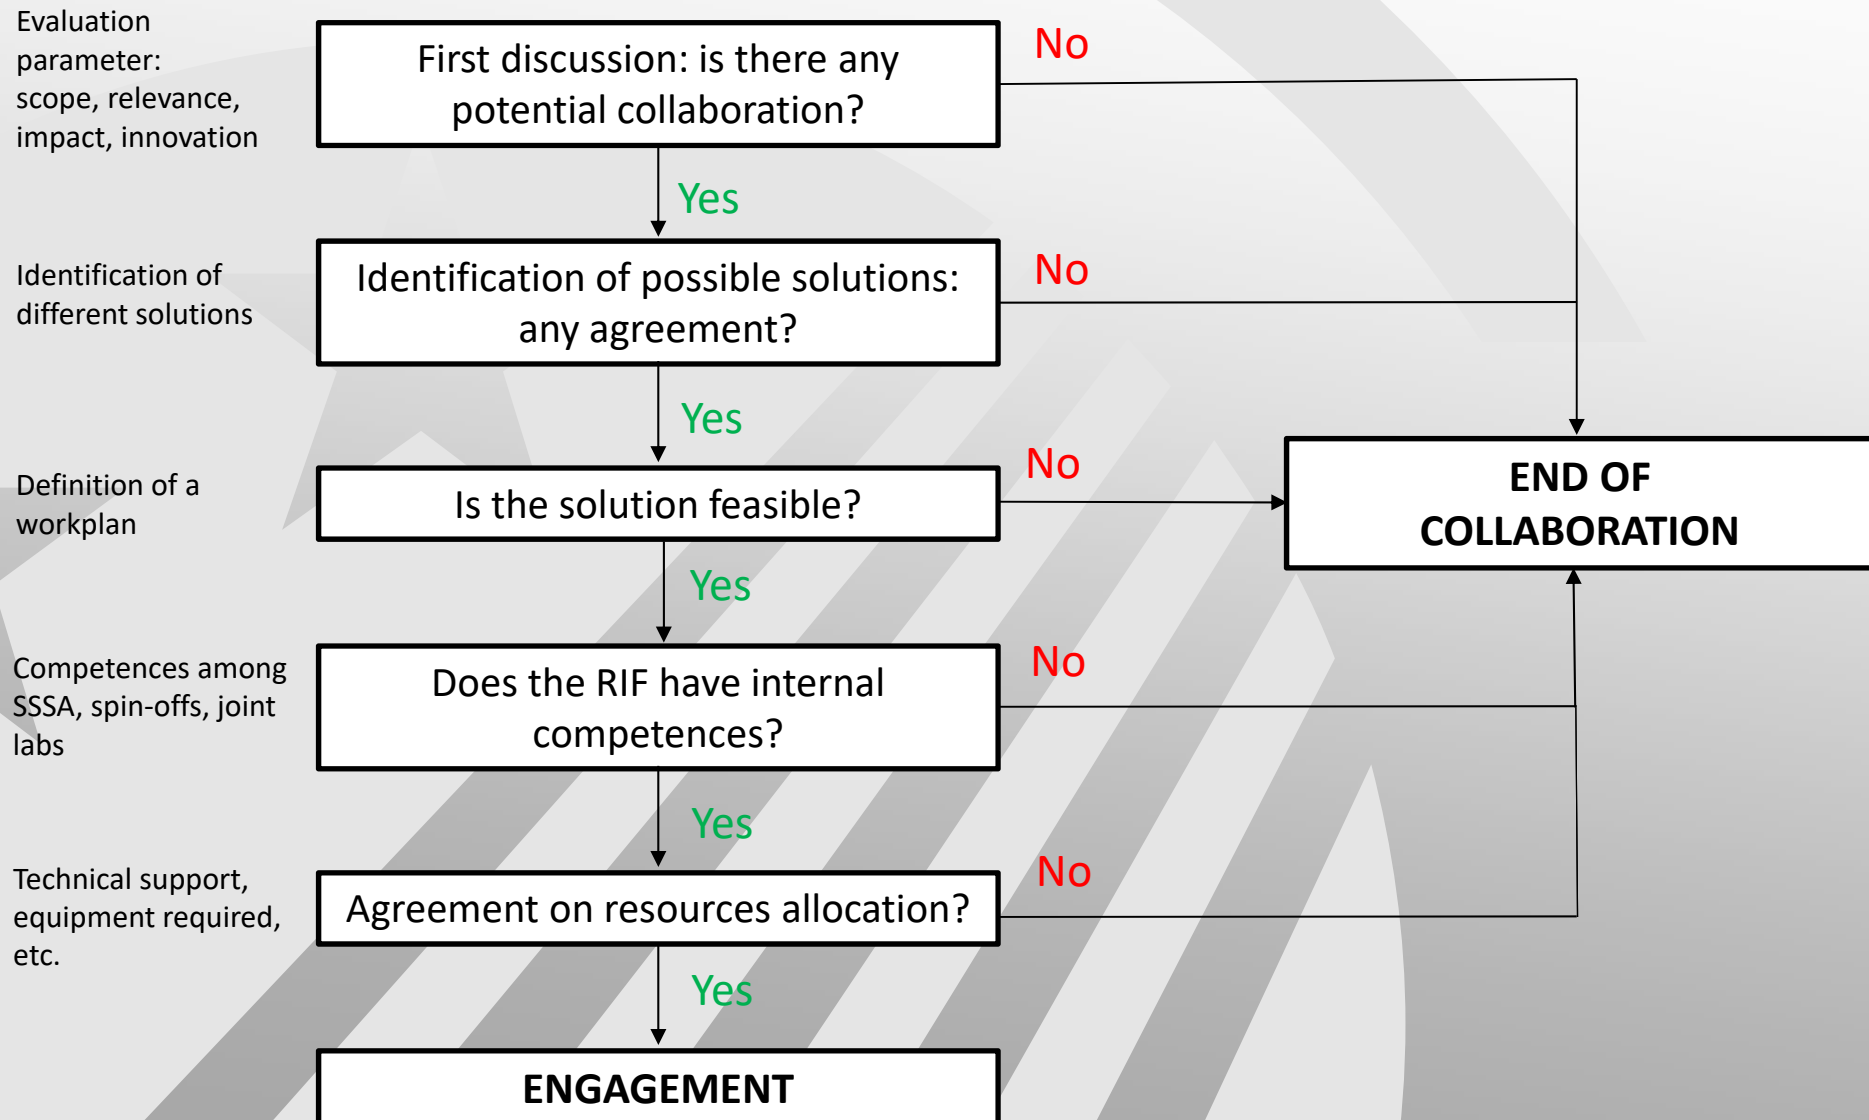

External  
infrastructures  
engaged

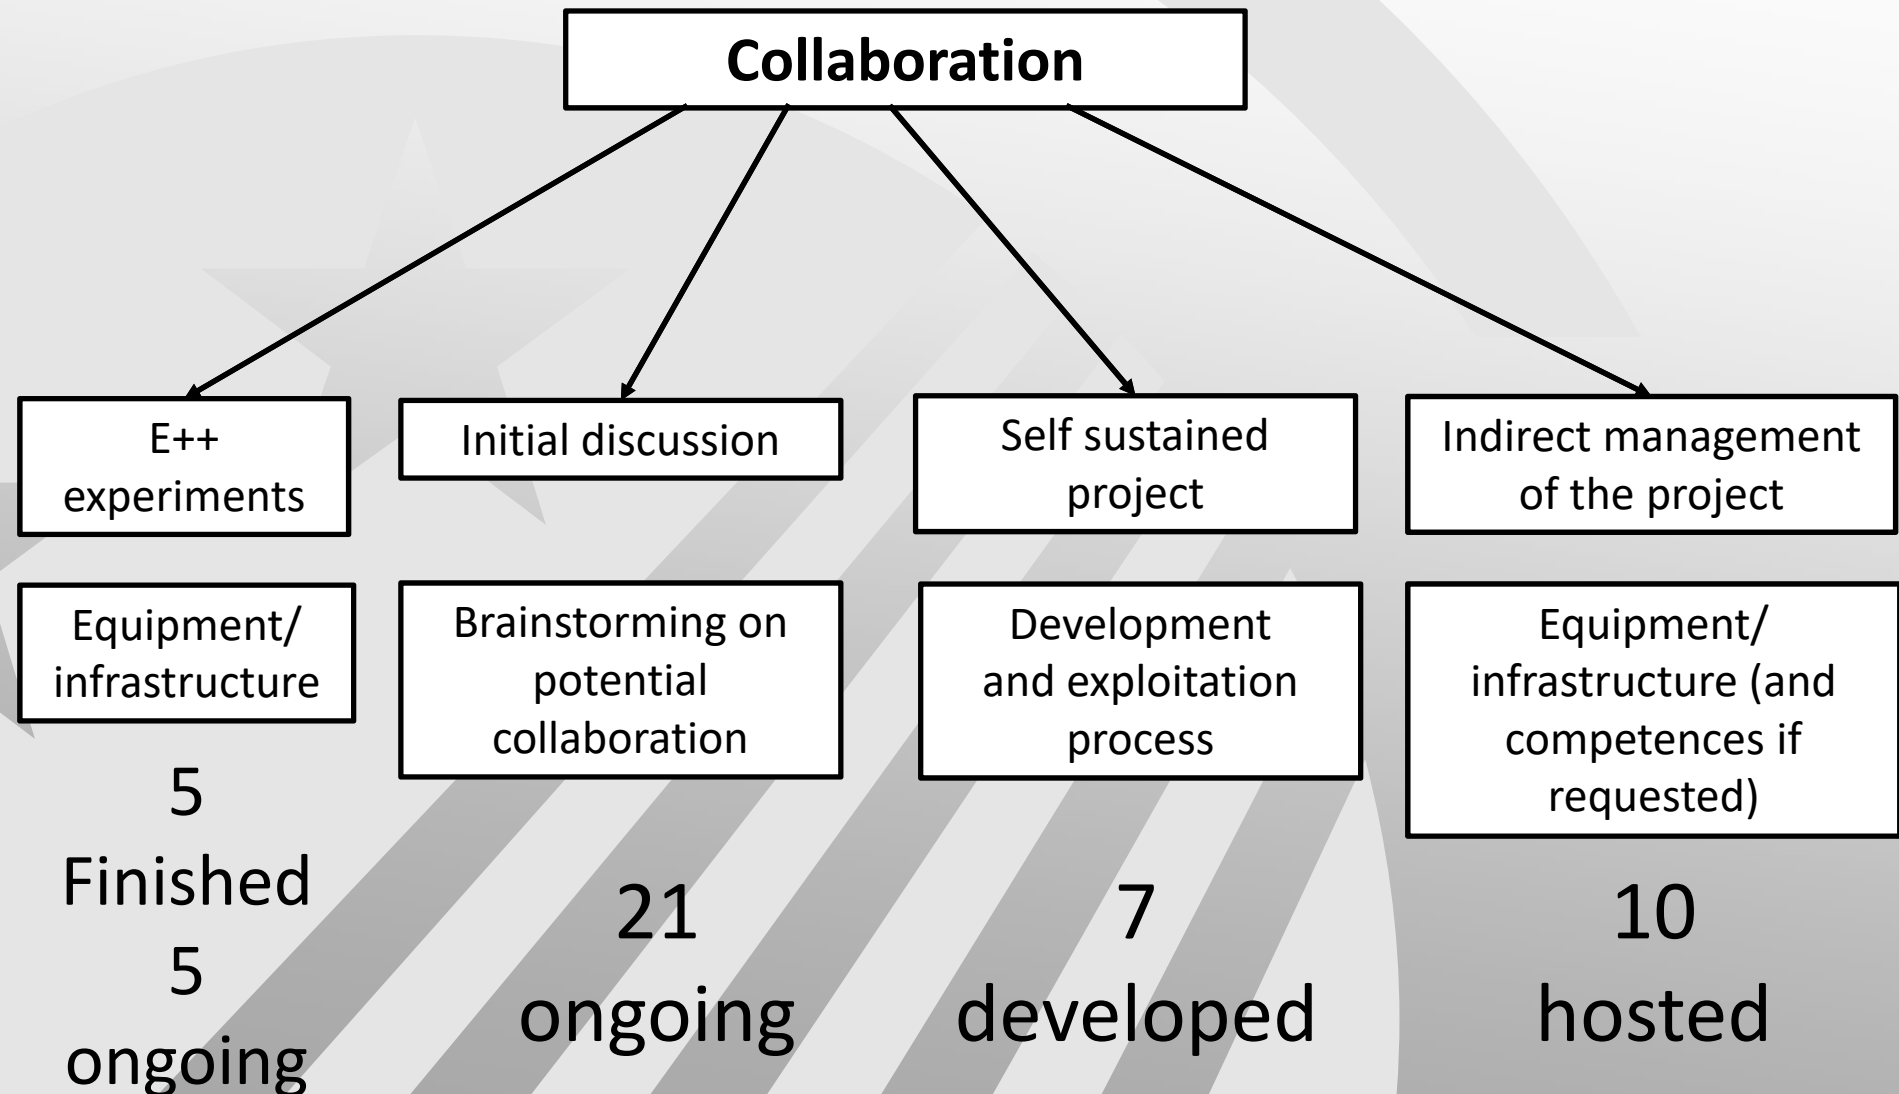

**BioFarm Colombini**

# Application process at Peccioli RIF

# Application process at Peccioli RIF

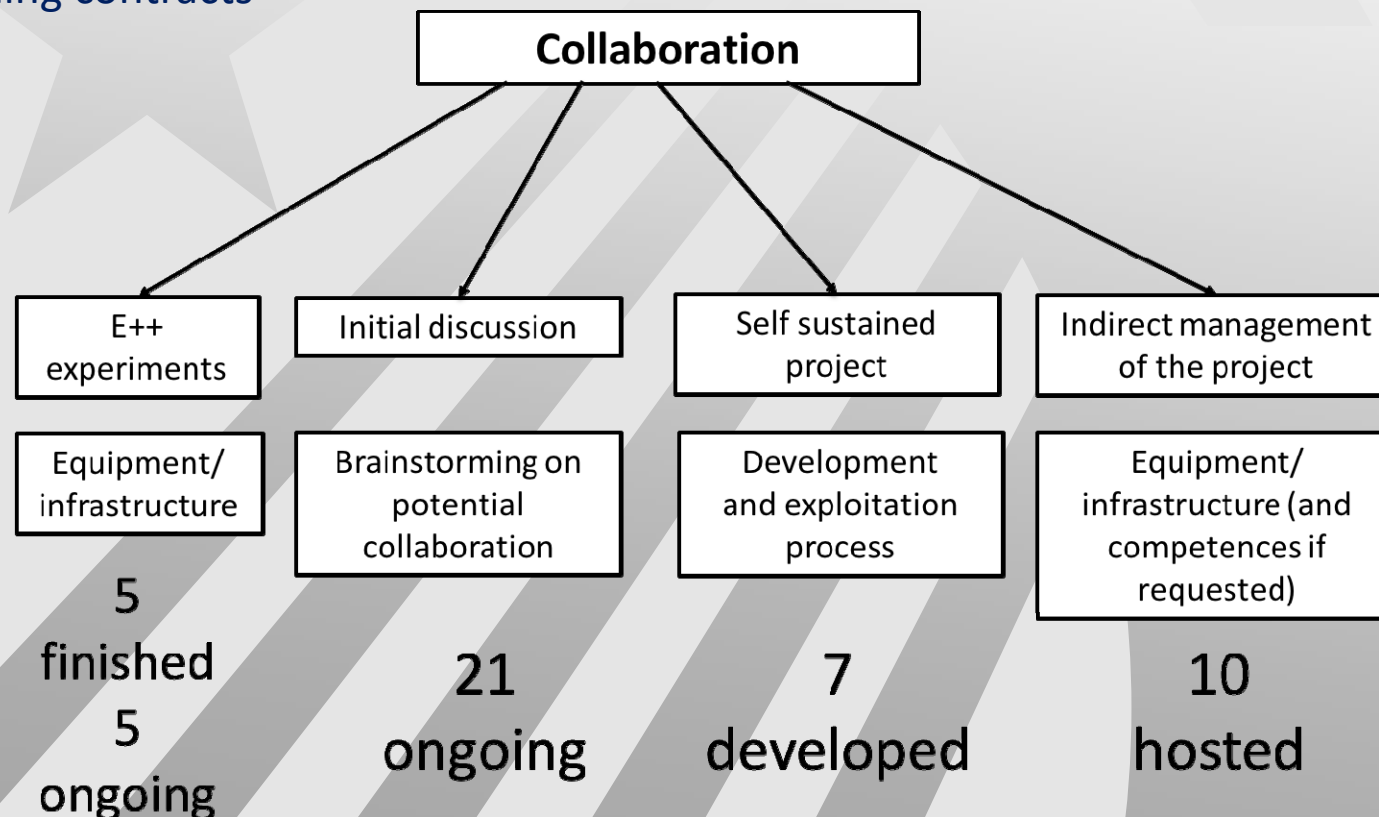

# Application process at Peccioli RIF

## The RIF strategy

- Exploiting the 10 E++ experiments hosted by the Peccioli RIF, the services and the evaluation methodology as tools to attract additional customers
- Contacting and negotiating with potential customers
- Hosting a few customers at nominal fee as a marketing tool for additional contracts
- Obtaining contracts

# Peccioli RIF: distribution of collaborations

# Peccioli RIF: 7 self sustained projects

1. **COMAU**: robotic arm for medical applications (BioAmico)
2. **KW**: smart refrigerator for plasma/blood
3. **MLR**: automated robot that analyses soil humidity, light, temperature
4. **Omniarobocare**: mobile robot for elderly assisted living
5. **Oranfresh**: automated cutting fresh fruits vending machine
6. **Whirlpool**: smart refrigerator
7. **Zucchetti**: mobile platform warehouse

Year	Client	Alignment with robotics and automation	Clarity and focus of proposed work	Evidence of commitment	Potential impact	Novelty of proposed work	Size of organization	Possible continuation	Presence of an exploitation strategy	Sum of scores
2016	COMAU	9	10	10	10	8	9	10	7	73
2015	KW	8	9	10	8	4	7	10	10	66
2016	MLR	9	10	9	8	2	8	10	9	65
2014	OMNIA ROBOCARE	10	10	10	8	8	5	3	3	57
2016	ORANFRESH	8	9	10	8	10	4	7	5	61
2014	WHIRPOOL	10	10	10	10	10	1	2	5	58
2015	ZUCCHETTI	10	10	6	7	2	3	3	4	45

# Peccioli RIF & Large Enterprises

## Industrial Labs

- Comau (2016)
- Piaggio (2016)

## Collaboration with large enterprises

Ericsson and Scuola Superiore Sant'Anna collaborate on 5G technology

## Joint labs with large enterprises

**WHITE**  
Wellbeing and Health Innovative Technologies Lab

Joint Open Lab—  
Wellbeing and Health  
Innovative Technologies  
Lab

i-Lab 4.0 – Connecting  
Machines and People

Joint Lab to Develop Advanced  
Robots and Smart Systems to  
Make a Difference in Life

# Peccioli RIF: recent activities

## Marketing activities

- **New website:** [www.pecciolirif.com](http://www.pecciolirif.com)
- **New account twitter:** @RIFpeccioli
- **New international event: INTERNATIONAL ROBOTICS FESTIVAL**, Pisa, September 2017
- Certification obtained as **Official TestBed** for Rock EU<sup>2</sup> → **European Robotics League Service Local Tournament 2017** hosted, wide **national and regional media coverage**

# Peccioli RIF: recent activities

## Experiments activities

- **Consultancy on legal and economic aspects** provided to **SAGA** experiment; contact with **three stakeholders** (Floriddia BioFarm, Colombini BioFarm, Castellani Vineyard)
- **LINARM++ and MOTORE++** experiments hosted @Rehabilitation Bioengineering Lab, Volterra; validation by **feedback from physiotherapists**

- **TIREBOT** experiment hosted @Gruppo Pretto S.r.l., to develop test in a **different real scenario** → **Gruppo Pretto** interested in **collaborating** on the **vision system** applied to a **NEW PRODUCT** (an electric vehicle)

- **Endorsement letter** developed for **SAGA** from *Colombini BioFarm* and **Questionnaire** developed from **GRAPE** Experiment and completed by *Castellani Vineyards*

**GRAPE**

4. We are seeking Wine Producer's feedback

In order to be as accurate as possible and obtain good results, we want to ask you some questions about the phage control, as well as ask you for some advice and recommendation for this project. A short survey follows:

**ECHO<sup>RD++</sup>**

# Peccioli RIF: recent activities

## Workshops organisations

- **26th May:** “Economic development and Robotics”, Handicraft National Confederation (Pisa Branch)

*28 attendees*

- **1st December:** “Robotics and Prototypes”, Artex (Florence)

*50 attendees*

# Plans and actions towards self-sustainability beyond ECHORD++

- **Tuscany Region Factory 4.0: CENTAURO FUNDED Project** Cowork, Efficiency, prevenNtion in the motor vehicles factory via Technologies with AUTomation and Robotics, Budget 4.8 M€ (2 years)
- **The recently launched Italian Plan “Industry 4.0”**: extending the impact of the RIF model to a Regional and National initiative by being designated **Competence Centre I4.0**
- **The European Robotics Research Infrastructures Network – TERRINet**: 2nd stage Deadline: 29 March 2017 17:00
- **Circular economy (2M€ investment on the ‘FACTORY OF THE FUTURE’ approved a few days ago by the Tuscany Region)**

## Peccioli RIF: lessons learnt and plans

---

- Peccioli **RIF Model well established** and running
- **Procedures to assist and evaluate E++ experiments** quite well established
- **10 E++ experiments** have already or will be hosted at the Peccioli RIF
- **Methodology to contact, select, engage and assist** other users being consolidated
- The Peccioli RIF system **attracting an increasing number of large companies and SMEs, generating contracts and moving towards self-sustainability**
- The **Regional Network on Educational Robotics** (more than 350 classes and more than 600 teachers in Tuscany) to **create awareness and invest on the future of robotics**
- Peccioli RIF **already working towards even more ambitious initiatives, including the creation of a Consortium to manage the RIF after the end of the E++ Project**
