

The European Coordination Hub for Open Robotics Development

**3<sup>rd</sup> Review Meeting – WP4**

**Jul 2015 – Nov 2016**

**Christophe Leroux, CEA**

**RIF@Paris-Saclay**

**Luxembourg – 2017-02-13**

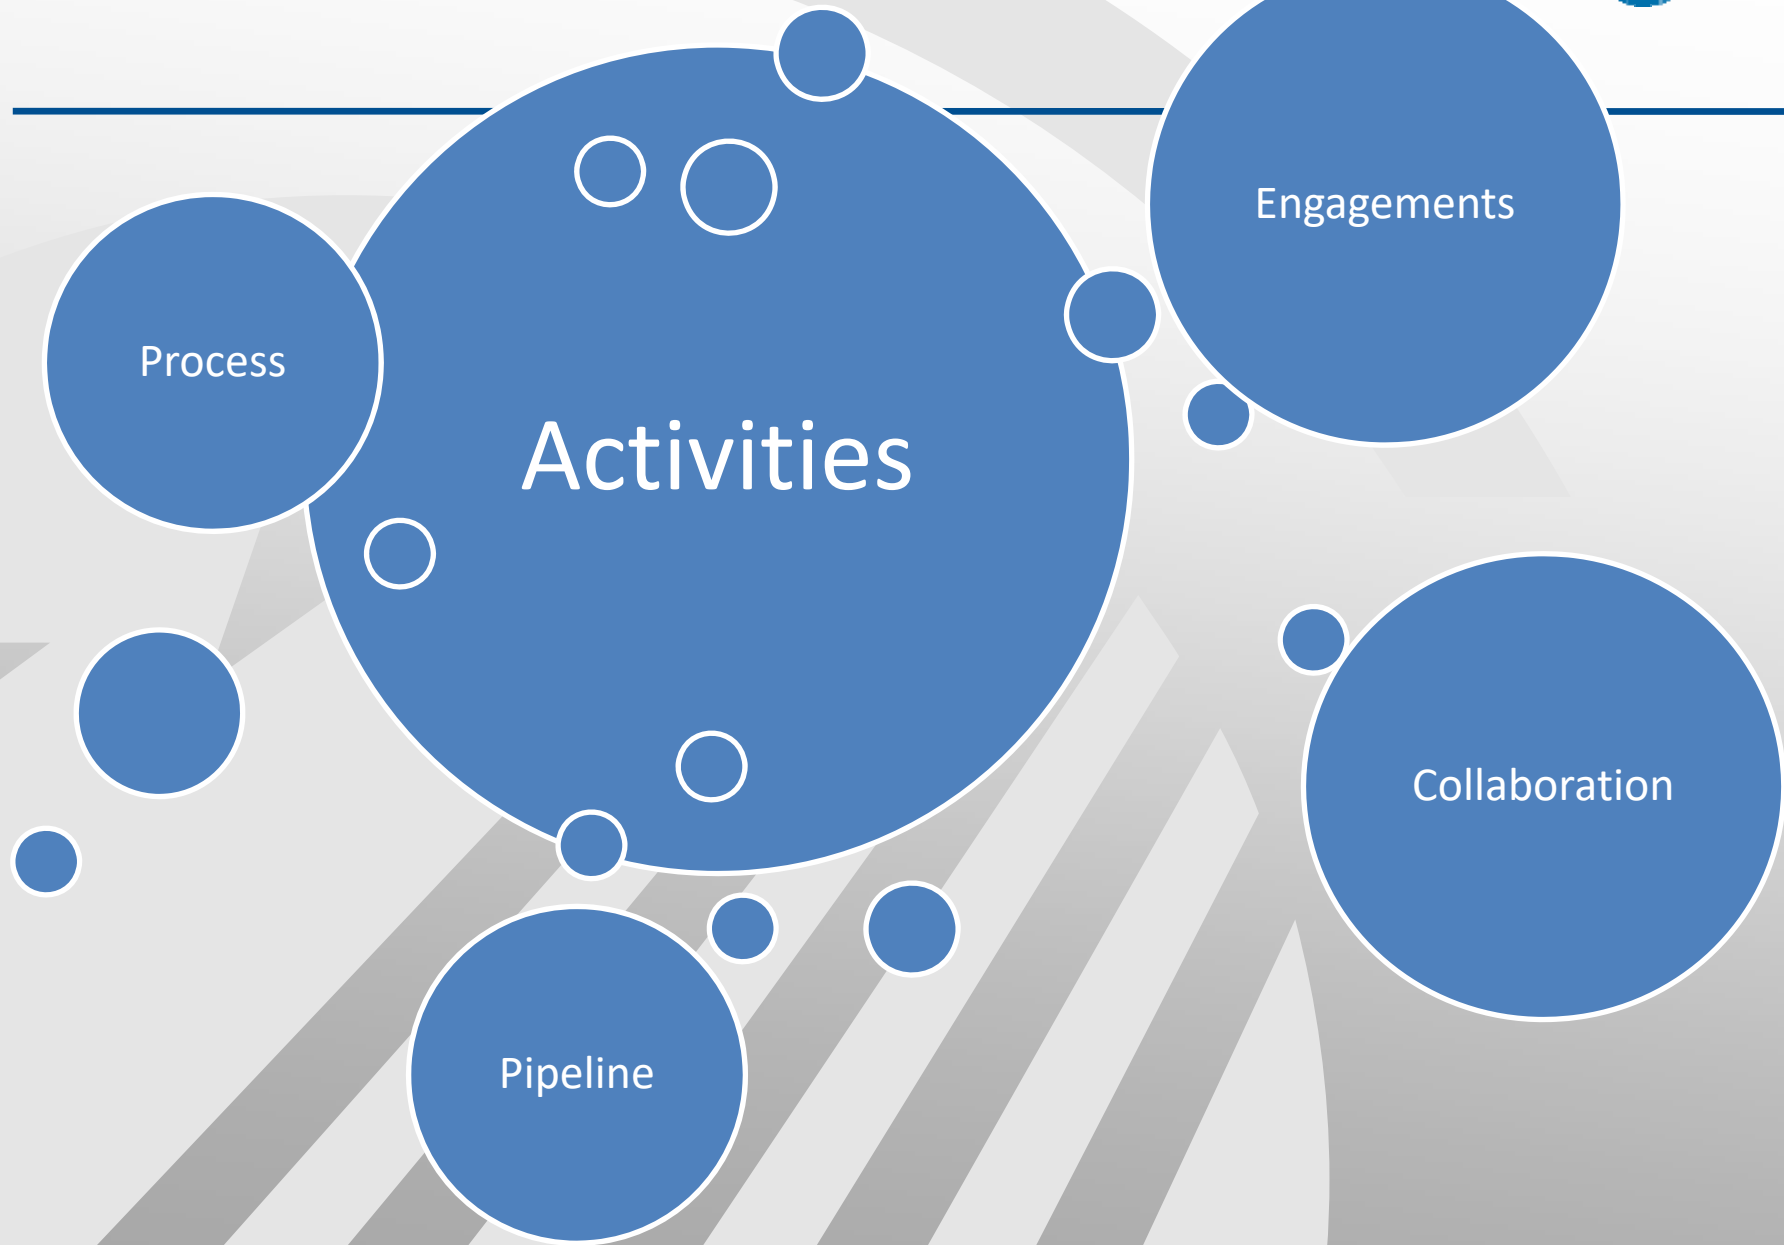

# Inside RIF@Paris-Saclay in 2016

## Plan of the presentation

## Global phasing

---

Engagement

Pipeline

Collaboration

# Engagements

## Actions

- Face to face,
- Phone
- Fairs
- Infodays,
- techdays

## Above 240 contacts

- 2/3 SME
- 1/3 large group

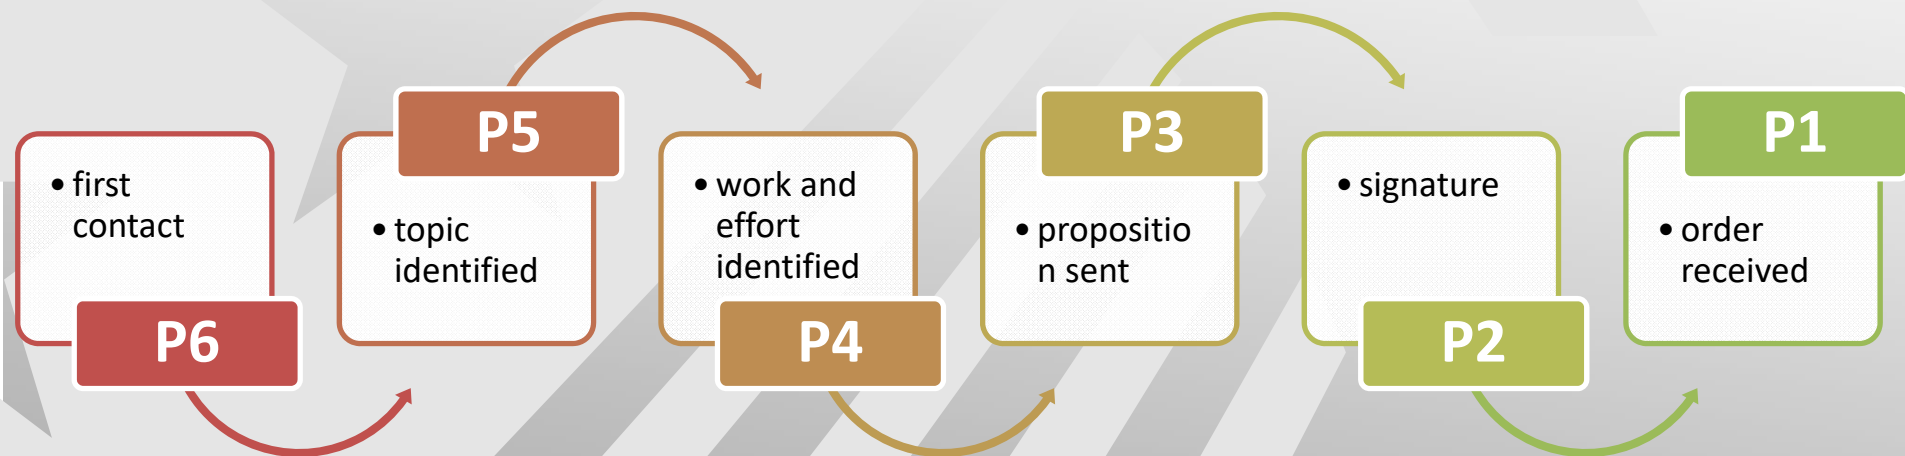

## Panel

- All over France
- 1 cross border

## Engagement process @RIF Paris-Saclay

Support creation

October 2016

Robot arm safe for operators

Applications: manufacturing,  
healthcare, nuclear, agro, game,

Three jobs created

Licencing five CEA patents

# Licensing

- Large group
- Gripper prototype
- Tech transfer
- Based on CEA patent (2009)

SME, GEBE2, integrator

Automatic sanding to improve aspect,

Finishing of metal parts

planar and non planar surfaces

SYBOT

Aeronautics

Large group

Automatic sanding

COBOMANIP, SARAZIN

Spain

Nuclear area

AREVA-NC

Teleoperation

Spent fuel reprocessing plant  
maintenance

Telemanipulation with SYBOT

SME

Mechanical  
fabrication

Polishing of metal  
moulds,

SYBOT

Automotive

Large group

Automatic manipulation

Programming by demonstration

SME, fabrication of furniture

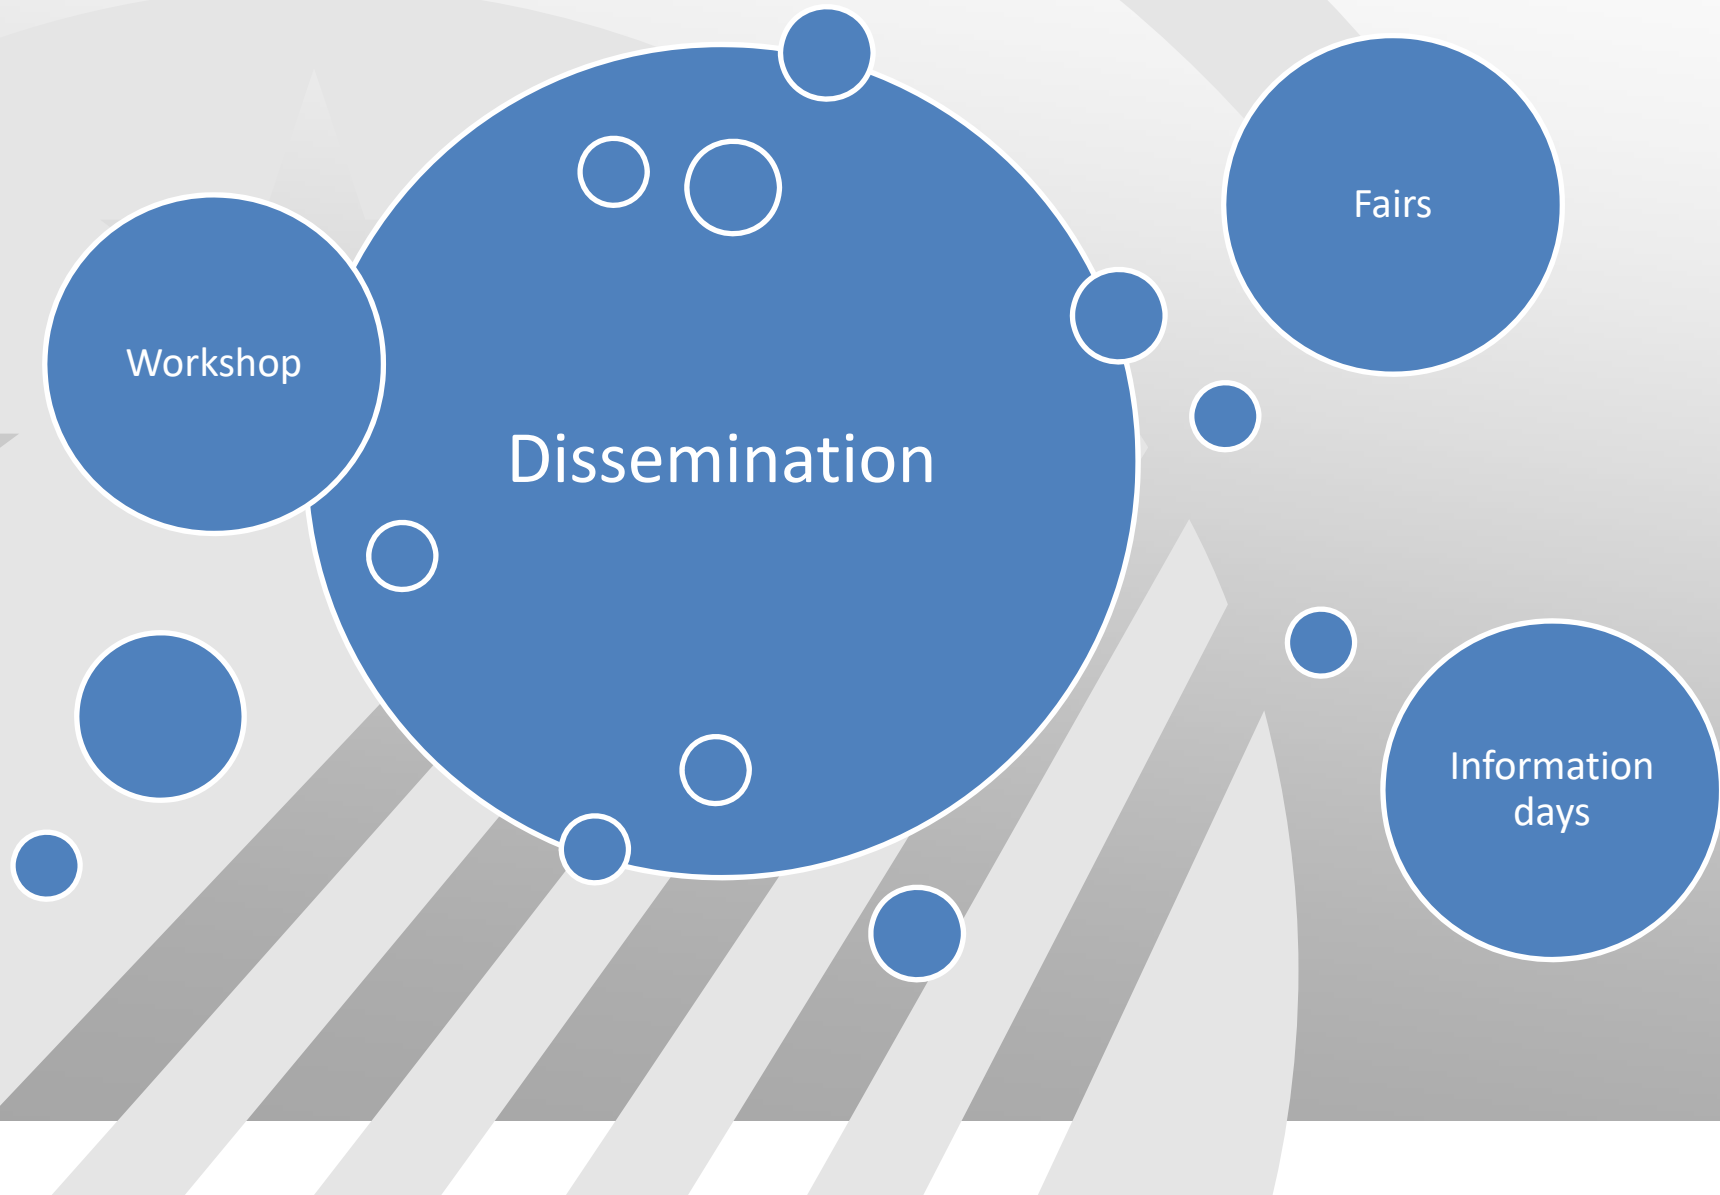

Paquetting task

Programming by demonstration

Comparison of collaborative robots in terms of safety

UR10 and Kuka IIWA

Publication soon

## Links with ecosystems

Factory Lab  
inaugurated in october  
2016

FFLOR, inauguration in  
January 2017

## Dissemination, outreach: Fairs, Workshops Infodays

Innorobot,

Industrie

Smart Industrie

Industrial Technologies

Hannover fair

World Nuclear Exhibit

Eurobois

Jeudis de la mécanique (3 / year)

Two CEA Techdays (industries)

# Video

- Public video available
- Video produced in February
- Omnidirectional video

20  
17

Pipeline

Planned

Collaboration

## Collaborative robotics

### Transport

- Large group,
- Public sector

### Assistance to brushing

- SYBOT
- on site
- TRL 7

## Foundation « *La main à la pâte* »

Primary & middle  
schools

International S&T  
teaching

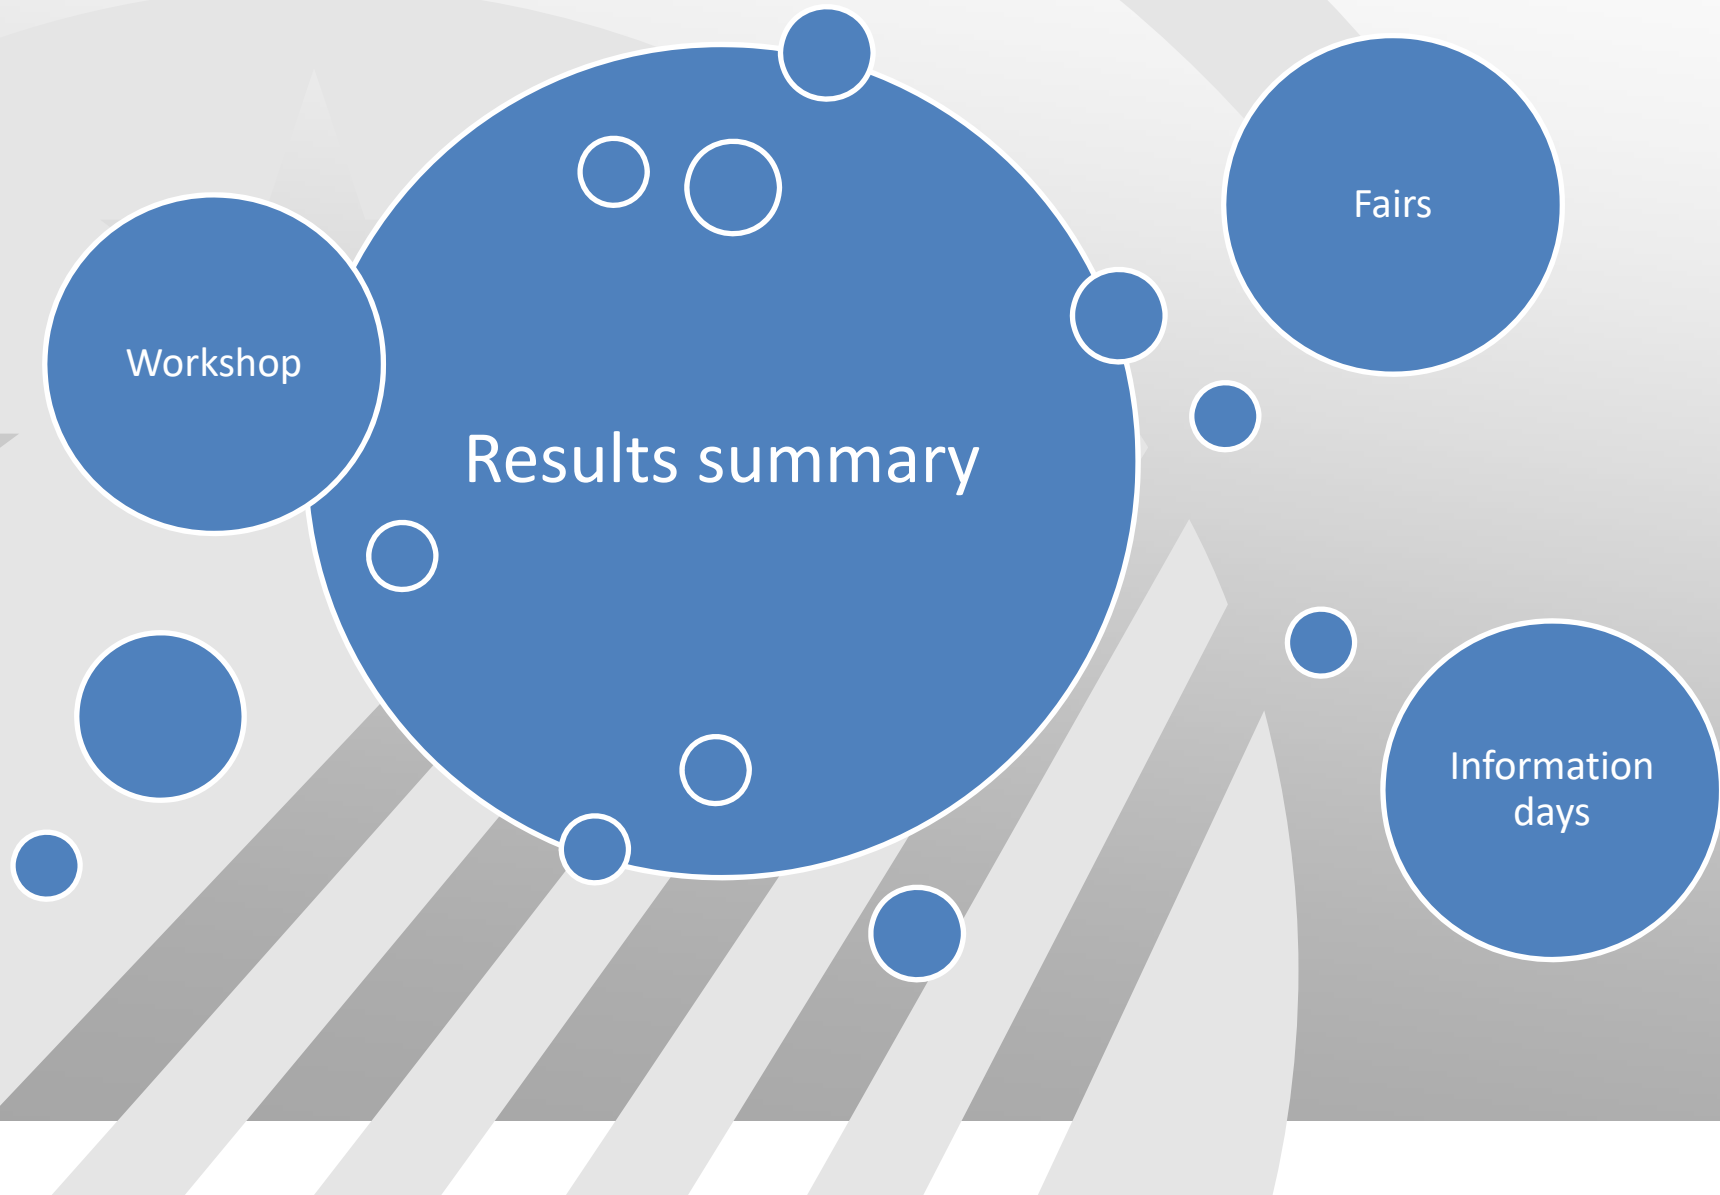

Assistance for  
teachers

**Inquiry-**  
**based learning**

Stimulate  
scientific spirit

## Summary

### Success stories, socioeconomic impact

- Six collaborations
- Support creation of iSYBOT
- Productivity, quality, production, MSD

### Effort

- Intense commercial & technical
- Engagements: several months
- Need to build trust
- Collaborations: six to eight weeks effort
- TRL 5 to 7
- Opportunistic choices
- Publication, fairs, info / techdays, workshops

## Next steps

### Strengthening ecosystem

- IdF region,
- SMEs: CETIM, SYMOP,
- ASTEC, CAP Digital, etc.

### France

- Regional platforms: Factory Lab, FFLOR
- CEA Tech PRTT

### Europe: Involvement in DEI

- I4MS Competence Centre in robotics for manufacturing
- Networking with I4MS robotics CC
- Aligned with DIH policy & S3 priorities

## Your turn?

Thank you for your attention

## RIF Paris-Saclay surrounding at night

Looking forward to welcoming you

## CEA key people in Echord++
